The screenshot shows a web browser window displaying a course page on the Great Learning platform. The browser's address bar shows the URL: olympus.greatlearning.in/courses/12629/pages/domains-and-process-implementation-under-ethical-hacking?module_item_id=527654. The Great Learning logo and navigation links (Home, Live Sessions, Certificates) are at the top. A 'My Courses' button and a user profile icon are in the top right. The page title is 'Domains and Process Implementation under Ethical Hacking'. On the left, a 'Content' sidebar lists several learning videos, with 'Domains and Process Implementation under Ethical Hacking' selected. The main content area features a video player with the title 'Ethical Hacking in Web Applications'. The video content discusses the accessibility of web applications and the focus on OWASP (Open Web Application Security Project). At the bottom of the video player, there is a rating prompt: 'How would you rate this video' with five stars. The Windows taskbar is visible at the bottom of the screen, showing the search bar and various application icons.

Domains and Process Implementation under Ethical Hacking

Ethical Hacking in Web Applications

Web Applications by nature are accessible remotely and hence can be at high risk for intrusion or cyber attacks.

We will focus on various parts of the Web Application Domain and introduce you to OWASP(Open Web Application Security Project) which is a one stop shop for documents, tools and forums for web developers and testers alike.
